

# CONTENTS

|  |       |
|--|-------|
| Foreward .....   | 1     |
| <b>Plenary lecture</b> – Metin Akay, “ <i>Advances in signal interpretation. From music to medicine</i> ”. . . (text not available)  |       |
| <b>Voice Disorders</b>   |       |
| E.P. Rosenfeld, D.W. Massaro, J. Bernstein, “ <i>Automatic analysis of vocal manifestations of apparent mood or affect</i> ”. . . . .  | 5-8   |
| H.J. Fell, J. MacAuslan , “ <i>Automatic detection of stress in speech</i> ”. . . . .  | 9-12  |
| A. Ozdas, H. Omar, R.G. Shiavi, S.E. Silverman, M.K. Silverman, D.M. Wilkes, “ <i>Investigation of glottal flow spectral slope as possible cue for depression and near-term suicidal risk</i> ”. . . . .         | 13-16 |
| <b>Laryngectomy</b>  |       |
| J. Lohscheller, M. Döllinger, R. Schwarz, U. Eysholdt, U. Hoppe, “ <i>Modelling of the laryngectomee substitute voice</i> ”. . . . .   | 19-22 |
| K. Murakami, K. Araki, M. Hiroshige, K. Tochinai, “ <i>A study of a direct speech transform method on laryngectomee speech</i> ”. . . . .  | 23-26 |
| V. Misun, “ <i>External excitation of the vocal tract after laryngectomy</i> ”. . . . .  | 27-30 |
| <b>Special Session on Infant cry analysis</b>  |       |
| <b>Plenary lecture</b> - W. Mende, K. Wermke, “ <i>Time variations of the Fundamental Frequency (Melody) and Resonance Frequencies in infant’s crying – key parameters for pre-speech development</i> ”. . . . . | 33-34 |
| C. Manfredi, W. Mende, P. Brusciaglioni, K. Wermke, “ <i>Resonance development and formant tuning phenomena in infant’s crying</i> ”. . . . .  | 35-38 |
| H.J. Fell, J. MacAuslan, C.J. Cress, L.J. Ferrier , “ <i>Using early vocalization analysis for visual feedback</i> ”. . . . .  | 39-42 |
| R. Sisto, C.V. Bellieni, D.M. Cordelli, G. Buonocore, “ <i>Cry features as a measure of pain intensity in newborns</i> ”. . . . .  | 43-46 |
| N. Bolfan-Stosic, A. Yliherva, G. Welch, ” <i>Vocal identity - differences and similarities between children from Croatia and Finland</i> ”. . . . .   | 47-50 |
| R. Nicollas, M. Ouaknine, A. Giovanni, J. Berger, J.P. To, D. Dumoulin, J.M.Triglia, “ <i>Physiology of vocal production in the newborn</i> ”. . . . .   | 51-54 |
| <b>Noise estimation/denoising</b>  |       |
| L. Helaoui, S. Ben Jebara, A. Benazza-Benyahia, “ <i>A two-channel speech denoising method combining wavepackets and frequency coherence</i> ”. . . . .  | 57-60 |

|   |       |
|---|-------|
| E. Jafer, A.E. Mahdi, “Wavelet-Based Noise Estimation Techniques for speech enhancement” . . .  | 61-64 |
| C. S. Lima, J. F. Oliveira, “HMM modelling of additive noise in the western languages context” . . . . .  | 65-68 |
| E. Iadanza, F. Dori, C. Manfredi, S. Dubini, “Hoarse voice denoising for real-time DSP implementation: continuous speech assessment” . . . . .                    | 69-72 |
| A.M. Krot, H.B. Minervina, V.V. Sarapas, “An efficient method of speech signal reconstruction based on neural network and fast deconvolution algorithm” . . . . . | 73-75 |

**Poster session**

|   |         |
|---|---------|
| K. Funaki, “On packet loss concealment using time-varying speech analysis” . . . . .  | 79-82   |
| F. Gittel, T.D. Smith, A. Th. Schwarzbacher, E. Hilt, “VLSI Implementation of a LMS Based Adaptive Noise Canceller” . . . . .   | 83-86   |
| M. Bostik, M. Sigmund “Speaker stress detection by analysis of glottal excitation” . . . . .  | 87-90   |
| J. Kleckova “An investigation of the speech production” . . . . .   | 91-93   |
| A. Petry, D.A.C. Barone, “Towards chaotic modeling of speech signals” . . . . .   | 95-98   |
| C.S. Lima, C.A. Silva, A.C. Tavares, J.F. Oliveira, “Blind source separation by independent component analysis applied to electroencephalographic signals” . . . . .      | 99-102  |
| C.S. Lima, J.F. Oliveira, “Spectral bi-normalisation for speech recognition in additive noise” . . . . .  | 103-106 |
| A.M. Krot, P.P. Tkachova, “Algorithm of phoneme identification using fast measurement of wiener kernels of speech signals” . . . . .                                      | 107-110 |
| A.M. Krot, H.B. Minervina, P.P. Tkachova, “Distinguishing and recognition of pathological speech based on estimation of control parameter of chaotic attractor” . . . . . | 111-114 |
| A. Somkuwar and R.P. Singh, “Blind signal separation of vocal signals taken in noisy environment” . . . . .   | 115-117 |

**Plenary lecture**

|  |         |
|--|---------|
| Osamu Fujimura, “A generalized concept of prosody” . . . . . | 121-135 |
|--|---------|

**Mechanical models**

|  |         |
|--|---------|
| C.H. Brown, F. Alipour, “Asymmetric and symmetric vocal fold oscillation in the excised squirrel monkey larynx” . . . . .                          | 139-142 |
| J. Horáček, P. Šidlof, J.G. Švec, “Numerical modelling of leakage-flow-induced vibrations of human vocal folds with Hertz impact forces” . . . . . | 143-146 |
| S.L. Thomson, L. Mongeau, S.H. Frankel, “Physical and numerical flow-excited vocal fold models” . . . . .  | 147-150 |
| C. Drioli, F. Avanzini, “Non-modal voice synthesis by low-dimensional physical models” . . . . .   | 151-154 |

## **Pathology classification**

- J.I. Godino-Llorente, T. Ritchings, C. Berry, “*The effects of inter and intra speaker variability on pathological voice quality assessment*” . . . . . 157-160
- O. Amir, T. Biron-Shental, “*Do oral contraceptives really have an adverse effect on voice quality?*” . . . . . 161-164
- F. Martínez, A. Guillamón and J.J. Martínez, “*A suggested metric for cepstral arma based speech classification*” . . . . . 165-168
- D. Picovici and A.E. Mahdi, “*Perceptually-based objective measure for non-intrusive speech quality assessment*” . . . . . 169-172

## **Special session on Singing voice**

**Plenary lecture** - J. Sundberg, J. Bauer, “*MR study of articulation in high-pitched singing*” . . (text not available)

- J. Bonada, A. Loscos, O. Mayor, H. Kenmochi, “*Sample-based singing voice synthesizer using spectral models and source-filter decomposition*” . . . . . 175-178
- D.M. Howard, G.F. Welch, J. Brereton, E. Himonides, “*Towards a novel real-time visual display for singing training*” . . . . . 179-182
- D. Mürbe, G. Hofmann, F. Pabst, J. Sundberg, “*Auditory and kinesthetic feedback in singing – significance and effects of training on pitch control*” . . . . . 183-186
- M. Kob and C. Neuschaefer-Rube, “*Acoustic analysis of overtone singing*” . . . . . 187-190
- C. Gabrielli, “*Lucretius, song and music: a historical approach*” . . . . . 191-193

## **Devices**

- C. Bickley, M. Birnbaum, J. MacAuslan, “*An assessment of fluency enhancement techniques for a telephone device for stutterers*” . . . . . 197-200
- G. Belforte, M. Carello, A. Dileno, M. Morero, “*Speaking valves: influence of the fatigue on the flow characteristics*” . . . . . 201-204
- D. Breen, R. O’Neill, T.D. Smith, A.Th. Schwarzbacher, “*VLSI implementation of a TSM/FSM algorithm*” . . . . . 205-208

## **Voice/hearing impairment**

- J. Kleckova, J. Krutisova, “*Some experiments in the Czech spontaneous speech recognition domain*” . . . . . 211-213
- B. Resch, W.B. Kleijn, “*Time synchronization of speech*” . . . . . 215-218
- M. Kammoun, K.Ouni, A. Bouzid, N. Ellouze, “*A classification methodology of hearing impaired pathologies based on dtw technique applied on vocal audiometry*” . . . . . 219-222

A.M. Marotta, F.J. Fraga, “*Comparison of two frequency lowering algorithms for digital hearing aids*”. . . . . 223-226

### **Numerical models**

K. Dedouch, J. Horáček, T. Vampola, J.Vokráł, “*Velofaryngeal insufficiency studied using finite element models of male vocal tract with experimental verification*”. . . . . 229-232

X. Niu, J.P.H. van Santen, “*A formant-trajectory model and its usage in comparing coarticulatory effects in dysarthric and normal speech*”. . . . . 233-236

E. O’Leidhin and P. Murphy, “*Preliminary glottal source modeling for pathologic voices*”. . . . . 237-240

K. Prikryl, “*Modelling the creation of Czech vowels by means of the vocal folds model and the models of vocal tracts*”. . . . . 241-244

### **Pathology detection**

T. Li, Il-suh Bak, C. Jo, “*The effect of normalization on parameters in discrimination of pathological voice using artificial neural network*”. . . . . 247-250

A. Van Hirtum, M. Guarino, A. Costa, P. Jans, K. Ghesquiere, J.-M. Aerts, P.L. Navarotto, D.Berckmans, “*Automatic detection of chronic pig coughing from continuous registration in field situations*”. . . . . 251-254

C.J. Moore, K. Manickam, S. Shalet, T. Willard, S. Jones, “*Spectral entropy signature of speech perturbation in adult acquired growth hormone deficiency*”. . . . . 255-258

C. Maguire, P. de Chazal, R.B. Reilly, P.D. Lacy, “*Identification of voice pathology using automated speech analysis*”. . . . . 259-262

### **Voice analysis**

T. Hirvonen, U.K. Laine, “*Comparison of objective and subjective classification of unvoiced stop consonants in stop-vowel syllables*”. . . . . 265-268

J. Szaleniec, M. Modrzejewski, W. Wszolek, “*Application of acoustic analysis of speech signal for evaluation of intubation-related damages of the speech organ*”. . . . . 269-272

H. Kuwabara, “*Analysis and evaluation of nasalized [g] consonant in continuous japanese*”. . . 273-276

F.R. Drepper, “*Topologically equivalent reconstruction of instationary, voiced speech*”. . . . . 277-280

M. Hagmüller, G. Kubin, “*Poincaré sections for pitch mark determination in dysphonic speech*”. . . . . 281-284

Author index . . . . . 285-286
