

INDEX

KEYNOTE LECTURE

Fire Whirls, Fire Tornadoes and Fire Storms: Physical and Numerical Modeling Meroney R. N.	1
--	---

CONTRIBUTIONS

Investigation of Flow and Pressure Phenomena Around Pyramidal Structures Ikhwan M., Ruck B.	10
A comparison of new wind tunnel measurements, field data and numerical calculations Wesseling J. P., Visser G. Th., Builtjes P., Balster F.	17
Wind tunnel investigation of the spatial variability of turbulence characteristics in the urban area of Basel City, Switzerland Feddersen B., Leitl B., Rotach M. W., Schatzmann M.	23
Wind-tunnel simulation to assess dispersion in the wake of the World Trade Center site Snyder W. H., Heist D. K., Perry S. G., Thompson R. S., Lawson R. E. Jr.	26
Inhomogeneous surface effects and boundary layer modeling technique Nadyozhina E.D., Shklyarevich O.B.	34
Turbulent transport of active and passive scalars from the ground-level sources in stably stratified environment Kurbatskii A. F., Kurbatskaya L.	40
Modelling distributions of air pollutant concentrations in urban environment for regulatory purposes : a hybrid approach Gokhale S. B., Khare M., Pavageau M.	48
A validation exercise of the P6 dispersion model using wind tunnel data about area sources Cavallaro M., Canepa E., Ratto C.	55
Emission and dispersion of pollutants during cold start of vehicles Brzozowski K., Wojciech S.	64
Influence of belt porosity on wind reduction between two mound-mounted shelterbelts Frank C., Ruck B.	70
Observation and analysis of plumes and gas from volcanic islands in Japan Kinoshita K., Kanagaki C., Tupper A., Iino N.	78
Comparison of model and in-situ measurements of distribution of atmospheric pollutants Zelinger Z., Stržič M., Jaňour Z., Berger P., Černý A., Engst P.	84
A wind tunnel and numerical investigation of atmospheric dispersion over several kinds of terrains in the convective boundary layer Kouchi A., Okabayashi K., Yoshikado H., Kitabayashi K., Okamoto S., Ohya Y., Ide Y., Kobayashi K.	91
Technical Subjects and Countermeasures on Wind Tunnel Experiments of Gas Diffusion Ohba R.	100
The transport of biogenic emissions in and above a finite forest area Aubrun S., Leitl B., Schatzmann M.	107
Pedestrian wind comfort – approach by PIV and sand erosion Dezső-Weidinger G., Massini M., van Beeck J.	114

Wind comfort technique study Cataldo J., Durañona V.	120
Modelling urban boundary layer in wind tunnels and with numerical tool Dezsó-Weidinger G., Mezősi B., van Beeck J.	126
Wind tunnel modelling of thermal effects due to surface heating at model scale Richards K., Leitl B., Schatzmann M.	131
Atmospheric Boundary Layer-like flows Cataldo J., Durañona V.	136
Physical simulation of atmospheric flow and turbulence Ferrero E., Longhetto A., Manfrin M., Montabone L., Mortarini L., Didelle H., Sommeria J., Giraud C., Bretoni D., Forza R.	143
Physical Model Results from Dispersion Experiments with Ground-Level Sources Schatzmann M., Leitl B.	149
Chemically reactive dispersion into atmospheric boundary layer Aguirre C., Simoëns S., Ayrault M.	154
Wind Tunnel experiments for LNG terminal siting Havens J., Spicer T., Sheppard W.	159
Atmospheric dispersion in non-homogeneous conditions – simulation of a wind tunnel tracer experiment Trini Castelli S., Ferrero E., Anfossi D.	167
Notes on wedge-shaped buoyant plumes from slits of finite width Fanneløp T. K., Webber D. M.	173
Two-plume mixing: trajectories and concentration distributions Contini D., Robins A.	177
Dispersion of emissions from a low building located downwind a tall building Saathoff P., Gupta A., Stathopoulos T., Lazure L.	185
Pollutant dispersion from 2D line source between 2D obstacles into atmospheric boundary layer Simoëns S., Ayrault M., Wallace J.	194
Computational modelling of car pollutant dispersion in closed car parks Brzozowska L., Brzozowski K.	201
Computer tomography for concentration field diagnostic in wind tunnel applications Cehlin M., Sandberg M., Westerberg U.	207
Wind tunnel experiment of tracer gas concentration fluctuation emitted from upstream position of a cubical building Sada K., Sato A., Michioka T.	215
Evaluation of field tracer experiments with respect to complex urban type boundary conditions Pascheke F., Leitl B., Schatzmann M.	223
Street scale problem Schatzmann M., Janour Z., Leitl B., Bezpalcova K.	229
A fluctuating dispersion plume and its entrainment in the wake of a normal plate with finite width Tamura T., Nakayama H., Sada K.	235

Physical modelling of dispersion of pollutant emitted at the portals of road tunnels Contini D., Procino L., Massini M., Manfrida G.	244
Wind tunnel modelling of pedestrian wind comfort at a new building complex in Hamburg Leitl B., Schatzmann M.	252
Wind tunnel experiments within the scope of the Oklahoma City tracer experiments Leitl B., Pascheke F., Schatzmann M., Kastner-Klein P.	259
Development of Vertical Turbulent Fluxes over An Idealised urban Roughness Schultz M., Leitl B., Schatzmann M.	264
