

Table of Contents

| | |
|--|-----------|
| Preface | 11 |
| Executive Summary | 13 |
| Acknowledgements | 15 |
| Chapter One | |
| Reducing the Flood Risk to Florence and Its Treasures | 17 |
| 1.1 The flood risk to Florence | 17 |
| 1.2 The drainage network of the Arno River | 17 |
| 1.3 The Arno River through Florence | 18 |
| 1.4 The Flood of 1966 | 20 |
| 1.5 The review of the International Technical and Scientific Committee (ITSC) of Florence 2016 | 23 |
| Chapter Two | |
| Reducing Flood Risk: The Legal Basis | 25 |
| 2.1 Introduction | 25 |
| 2.2 The Law prior to 1989 | 25 |
| 2.3 The Law n. 183 (1989) and later developments | 26 |
| 2.4 Fragmentation and inefficiency | 27 |
| Chapter Three | |
| The 1996 Hydraulic Risk Plan of the Arno River Basin Authority | 29 |
| 3.1 Introduction | 29 |
| 3.2 Hydraulic risks in the Arno Basin and Florence | 29 |
| 3.3 Floods in the Arno Basin: historical analysis | 30 |
| 3.4 Previous solutions proposed to mitigate the hydraulic risk in the Arno River | 31 |
| 3.5 Goals and strategy of the HRP | 32 |
| 3.6 Supporting data collection and modeling | 32 |
| 3.7 Analysis of the upper part of the watershed | 36 |
| 3.8 Structural measures foreseen for the Arno tributaries | 42 |
| 3.9 The HRP strategy | 43 |
| 3.10 Hydraulic simulations to estimate the beneficial effects of the works in the Plan | 44 |

| | |
|---|-----------|
| Chapter Four | |
| The 2005 Hydro-Geological Plan (PAI – Piani di Assetto Idroeologico) | 47 |
| 4.1 Introduction | 47 |
| 4.2 Hazard and risk | 48 |
| 4.3 Identification and mapping of hazardous areas | 48 |
| 4.4 Identification of risk areas | 52 |
| 4.5 Interventions needed and funding required | 54 |
| Chapter Five | |
| The Management Plan of Flood Risk (PGRA) | 57 |
| 5.1 The PGRA | 57 |
| 5.2 Goals foreseen by PGRA | 58 |
| 5.3 Homogeneous areas | 58 |
| 5.4 Hazard maps | 58 |
| 5.5 Risk maps | 61 |
| 5.6 Measures to be undertaken | 62 |
| 5.7 Monitoring and VAS procedure | 65 |
| Chapter Six | |
| Observations and Recommendations of the ITSC | 67 |
| 6.1 The ITSC Review | 67 |
| 6.2 Planning for and implementing flood risk reduction measures | 67 |
| 6.3 The Plans | 68 |
| 6.4 Progress | 70 |
| 6.5 Further Investigations | 71 |
| 6.6 The Arno River channel in Florence | 72 |
| 6.7 Communicating the flood risk to the public | 73 |
| 6.8 Climate change impacts | 74 |
| 6.9 Principal Observations and Recommendations | 74 |
| 6.10 Time for action – final words | 76 |
| | |
| Appendices | |
| Appendix A | |
| References* | 79 |
| Appendix B | |
| ITSC Members | 85 |
| Appendix C | |
| The Arno River, Florence and Flood History | 89 |
| C.1 Background | 89 |
| C.2 The Arno River in Florence | 89 |
| C.3 Flooding of the Arno River in Florence: a survey | 108 |
| C.4 The debate on possible remedies before the establishment of the Water Basin Authority | 121 |

Appendix D

Comments on actions taken since 1966 **131**

D.1 Introduction 131

D.2 Lowering of the aprons of the S. Trinita and Ponte Vecchio bridges 131

D.3 Construction of the Bilancino dam 139

D.4 Design and construction of Figline flood retention areas 142

Appendix E

Sources of Photos **151**
